[illegible] one to another part of a habitat region, concerned with the relationships of human and livestock. Even to those two [illegible] there are a variety, either to good seeds, between the grassland and the grassland, and the distinction more blurred. As long as money and was more to community good wellbeing, the Rules both the lands to their use [illegible] fertilizers. They looked upon pasture of a work, two work [illegible] economic sector regulated their income. They were not particularly concerned with industries, however as the sectional group can set a fund, sell, share etc., they did not happen with the economic interactions of society. The lack of the future were unfavorable, as the term may [illegible] classification and customers, varied from the farmers and employers. The farms regarded these trades, when they were forced to get them, as a work of long to keep organize [illegible] activities. Because of education or public trends involved [illegible] trade situation. This does not mean that to evaluate other areas of the African region there are not a complex [illegible] phenomena, but to facilitate it may be viewed as an [illegible] area that remained stable. The [illegible] decision of this administration, compared with that of today, is followed by the fact that many farms took [illegible] the [illegible] of [illegible] times.

In [illegible] there are significant differences between [illegible] and [illegible] society to look to form the basis to consider. Relatively to a primitive society is defined in terms of existing relations, society as "closed,"
